

*A Company Specializing in Environmental Protection and Remediation Technologies*

August 3, 2005

For Immediate Release

**ACQUISITION OF CARBON ELECTRODE INTELLECTUAL PROPERTY WILL  
REDUCE THE CAPITAL COST OF THE DESEL TECHNOLOGY FOR TREATING  
DRINKING WATER AND WASTE WATER**

ENPAR's patented DesEL technology utilizes the principle of capacitive deionization to treat drinking water and waste water. Management is committed to aggressively reducing capital costs where possible to facilitate marketing and sales of these custom built products.

Dr. Gene Shelp, President & CEO of ENPAR Technologies Inc., is pleased to announce that the Company has acquired the intellectual rights and equipment to produce carbon electrodes from Material Methods of California, USA for USD \$50,000. These electrodes are an important component of the electrochemical cell that is the essence of the DesEL technology. Management believes that the ability to produce our own electrodes, coupled with current technological advancements, will substantially improve the cost competitiveness of commercial installations.

The facility is expected to be operational by the end of August, 2005.

**ENPAR is a "Technology Company" applying its patented and proprietary "Electrochemical Technologies" to the treatment waste water and drinking water contaminated by metals or nutrients i.e., nitrate/ammonia associated with the mining, metal processing, chemical, agricultural, municipal and waste management sectors. The common shares trade on Tier II of the TSX Venture Exchange under the symbol "ENP".**

The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.
